

**IN THE SPECIFICATION**

Please amend paragraph [00036] of the specification as follows:

[00036] The star-shaped configuration of the cooling element that is composed of the four flat elements 5a which pass through the lens, which is not illustrated in Figure 2, ensures that the position of the cooling element with respect to the light source 4 that is attached to it is fixed securely, so that there is no need to provide any additional holding or attachment elements for the light source 4.
